

LOCAL INTELLIGENCE.

WEDNESDAY, SEPTEMBER 7, 1887.

TERMS OF THE NEWS AND HERALD.—The weekly edition, three dollars per annum, in advance. Weekly edition, one dollar and fifty cents per annum, in advance.

RATES FOR ADVERTISING.—One dollar per line (solid column) for the first insertion, and fifty cents for each subsequent insertion. This rate applies to advertisements of every character, and is payable strictly in advance. Obituaries and notices of respect are charged for as advertisements. Marriage notices, and simple announcements of deaths, are published free, and are selected. Liberal terms for contract advertisements.

New Advertisements.

Water—W. E. Aiken.
Cotton Ginners—Jas. Pagan.
New Furniture—R. W. Phillips.
Wait for the Wagon—Clyde G. Desportes.
School Notice—J. C. Caldwell, Chm. Bd. Trustees.

Local Items.

Cotton in the county is said to be opening very rapidly.
Our fall term of Court meets two weeks from Monday. His Honor, Judge Wallace, will preside.
The bird season will soon open, and our sportsmen are anxious to again try their skill in the field.
Quite a pretty little rumpus took place on Tuesday at the new building of Mr. Chas. A. Douglass. Say, Joe, which whipped?
The Columbia Register now reaches its subscribers in this place at nine o'clock in the morning, which is quite a treat to its patrons.
The familiar cotton wagon is again seen on our streets. They will continue to make their appearance for some time to come.
Within ten days the new bank building will be completed, and the financial institution of the county will move into its old quarters.
Goods arriving daily in all departments. If you don't see what you want ask for it.

J. O. BOAG'S.
Mr. A. Williford has already marketed twenty bales of cotton from his farm, and has out ready for the gin a dozen more. He expects to make two hundred bales from his crop.

—Trial Justice Bray sent on Saturday three prisoners for trial at the next term of the Court. Two of them succeeded in finding a bond after reaching town and were released. The other was placed in jail.

—The first bale of cotton of the season was received at this place on the 17th August. During the month the total receipts were seventy-one bales. This is unusually heavy for the month of August.

—See the new advertisement of Dr. W. E. Aiken in another column. Besides the articles mentioned there, he keeps in stock everything usually found in a first-class drug store, and would be glad to see his friends when they need anything in his line.

—Messrs. R. J. McCauley & Co. bought on Friday last 121 bales of cotton, ninety of which were bought in town. On Saturday they purchased 124 bales. The staple is opening rapidly, and our farmers seem to be marvellously successful in their marketing.
—Buggies, Buggies, Buggies, on hand and to arrive, Cheap, Cheap, Cheap for the Cash. Call and see for yourself.
J. O. BOAG.

—Mr. John Vinson will accept our thanks for his interesting letters on his trip to Texas, the last of which appeared in our last issue. We are sure that our readers appreciated his effort, and will regret to learn that he will remove to the Lone Star State during the coming fall. Our county can ill afford to lose such a citizen.

—We are requested to call the attention of the County Commissioners to the condition of the road leading from Rossville to the bridge over Wateree Creek. In several places the recent rains have made gullies from six to fifteen inches deep in the road bed, thus rendering it almost impassable. It should be attended to at once.

PERSONAL.—Messrs. Q. D. Williford, Jas. N. Center and D. A. Hendrix returned from the Northern markets on Friday. They all express themselves as having a pleasant trip.

A NEW PASTOR.—The Rev. H. B. Blakely, who was recently elected pastor of New Hope A. R. P. Church, in this county, has accepted the call and will enter upon his duties sometime during the present month.

FARMER'S FRIEND.—Don't fail to read the new advertisement of Major Pagan found in another column. He keeps on hand everything in the way of machinery which our farmers need, and will be pleased to have a call from them when they need anything in his line.

MOUNT ZION INSTITUTE.—The Mount Zion Institute will open on Monday, the 12th inst. There is a full corps of teachers, and the advantages offered are inferior to none in the State. The prospects for the coming session are very encouraging, and it is expected that considerably more than two hundred pupils will attend.

AN OLD LADY.—Mrs. Rachel Chisholm, perhaps the oldest living white lady in the State, who resides near the Chester and Fairfield line, at Cornwells, will celebrate her one hundredth birthday on the 17th inst. She is remarkably active for one of her age, and apparently has a good while yet to live. May she live to enjoy other such celebrations.

Brace Up.

You are feeling depressed, your appetite is poor, you are bothered with headache, you are nervous, and generally out of sorts, and want to brace up. Brace up, but not with stimulants, spring medicines, or bitters, which have for their basis very cheap, bad whiskey, and which stimulate you for a hour, and then leave you in worse condition than before. What you want is an alternative that will purify your blood, start healthy action of Liver and Kidneys, restore your vitality, and give renewed health and strength. Such a medicine you will find in Electric Bitters, and only 25 cents a bottle at McCauley, Rice & Ketchum.

WAIT FOR THE WAGON.—By reference to another column in this issue, our readers will find something of interest in the announcement of Mr. U. G. Desportes. The White Hickory wagon has been used by too many citizens of our county to need any recommendation. It also has in stock a fine line of breech and muzzle loading shot guns, revolvers, knives, saddles, bridles and many other goods too numerous to mention. Inspect his stock and save money in your purchases.

READ.—Mrs. D. Landers left for New York a few days ago; since her arrival there she has engaged a first-class milliner for the coming season, and they are selecting one of the finest stocks of millinery ever brought to this market. Parties will do well to call and examine before purchasing elsewhere, as she intends giving special attention to this part of the business.

Q. D. WILLIFORD & CO.—Messrs. Q. D. Williford & Co. were kept busy on Tuesday moving into their new quarters in the bank building. Besides they are receiving daily their fall and winter stock, which they are opening and placing on their counters for inspection. Although comparatively a new firm, they are too well known to our readers to require any commendation from us. Go see for yourself.

NEW FURNITURE.—Read the new advertisement of Mr. R. W. Phillips, headquarters for furniture, household decorations, sewing machines, and everything usually found in a first-class furniture store. He asks an inspection of his goods, and a comparison of his prices with other dealers. It is to your interest to do so, as we guarantee you will find by calling on him when you need anything in that line.

BACK IN OLD QUARTERS.—Mr. D. A. Hendrix returned to his old stand in the bank building on Wednesday, where he will be found in the future, prepared and anxious to please all who desire anything usually found in a first-class mercantile establishment. He is at present in New York purchasing his fall and winter stock, which in a few days will be open for inspection. Give him a trial before making your purchases.

RAILROAD SMASH UP.—On Thursday evening the north-bound freight train which reaches this point at about seven o'clock, p. m., met with a serious accident at the pump, just below town. The train consisted of twenty-six loaded cars. Some distance below the pump one of the coupling pins broke, and the engine and twelve cars ran up to the pump for water. In a short while the other fourteen cars came dashing around the curve, telescoping the twelve cars in front and completely wrecking two cars and seriously damaging four others. It was twelve o'clock when the train, in good order, pulled out for Charlotte. From reports it was a clear case of accident, and blame can be attached to no one.

MCCAULEY & CO.—Mr. R. J. McCauley returned this week from a trip to the mountains, in order to be present during the cotton season. Mr. McCauley and his partner, Mr. Macaulay, are too well known to the people of Fairfield to need any endorsement from us. In conversation with a member of the firm on Friday, we learn that they expect to handle the largest number of bales of any cotton merchant in the up-country during the present season, and will pay the highest price in hard, clean cash. Give them a bid before selling. Our merchants in surrounding towns would do well to correspond with them before closing contracts with Northern firms. They mean business, and we are sure deserve success.

A PECULIAR PETITION.—We learn from the Columbia correspondent of the News and Courier, that a petition asking for the removal of Supt. G. R. Talcott, of the Richmond & Danville syndicate of railroads, was in circulation in Columbia on Wednesday, and that similar petitions for signature would be put out at all points on that line in this State. We have made inquiry into this matter from our business men, and find that no such petition is in circulation in our town. We do not hesitate to state that the action of Mr. Talcott, as Superintendent, has called forth any number of criticisms from our people, but no such news as a united effort to effect his removal has been carried.

BURNED TO DEATH.—A colored child, about eight months of age, was burned to death on the plantation of Mr. T. L. Gladden on Tuesday last. The mother, Mary Shannan, being going to work in the field, covered the fire up and locked the infant up in the house. A colored man on going to the house to see the father found the door fastened, and on pushing it open, discovered the child lying in the fire dead. It was burned to a crisp from its feet to its armpits. It is supposed that the child crawled to the fire, and while playing with it fell among the coals with the above result. Such cases as this are of frequent occurrence in this State, and something ought to be done to compel parents to be more careful with their offspring.

FINE HAY.—Mr. W. R. Doty, one of the county's most progressive and successful farmers, on Monday began mowing his German millet. He had twenty-one acres planted, and the land had been thoroughly prepared, rolled and made as smooth as a pavement. Three reapers were placed in operation Monday morning, and before sunset the entire field had been harvested, which will turn out at the least calculation fifty tons of hay. Some weeks ago the army worm made its appearance in his field, which compelled him to harvest ten days sooner than he otherwise would have done, causing him a loss of about twenty-five tons.

Why will our farmers continue to pay fancy prices for Western and Northern hay, when an effort on their part will produce results similar to that of Mr. Doty? It is useless for our people to buy a single pound of foreign hay, when it can be made so successfully within our own border.

PATR JONES.—The following is a list of the petit jurors drawn to serve at the approaching term of the Court, which will be in session for two weeks: Charles B. Lyles, Robt. V. Cline, P. H. Flannigan, Joseph L. Bagby (colored), C. E. Leitner, Thos. J. Rabb, David F. Richardson, T. J. Robertson, P. C. Mellichamp, D. H. Robertson, Oliver Sloan (colored), Samuel Duke, N. C. Robertson, Thos. B. Stewart, J. F. Entzinger, Jonathan Abbott, Dan McDonald, Joseph W. Clarke, D. A. Doty, John B. Montgomery, George W. Langford, J. D. McDowell, Rice D. Jones, John M. Lemmon, T. M. Boulware, Jr., M. L. Cooper, James M. Raines, J. T. Stitt, Osborn Squirewell (colored), Andrew J. Boyd, Press G. Smart, Hiram Hollis, J. A. Desportes, W. W. Kennedy, P. B. Cornwell.

GALA DAY.—The 8th instant has been appointed "Gala Day" in our sister town of Yorkville. It will be celebrated by a number of male races and the sport promises to be exceptionally fine. The proceeds will go towards defraying the expenses of securing a cemetery for the town. This reminds us of the fact that our town is without a cemetery. In our large cities and even in our country towns, one of the chief attractions is their cemeteries. Winnsboro can ill afford to be behind her sister towns. Cannot something be done towards securing suitable premises and establishing a town cemetery? It would add much to the attractions of our town, and at the same time would be more convenient and acceptable to our people generally. Who will move in the enterprise?

COTTON FIRE.—Mr. A. Williford had the misfortune to lose about three bales of cotton on Thursday night. His wagon started from his Jackson Creek place on Thursday evening last. According to the statement of one of the colored men, one of the bales had caught fire at the gin, but it was thought to be extinguished with water placed on the wagon with the other four bales. It seems that in this they were mistaken, as it was found on the road that the entire load was on fire. When it was discovered the team became frightened and ran for some distance before they could be halted, which only added to the fury of the flames. Before it could be gotten under control the five bales had all been burned considerably, and his wagon body destroyed. The entire loss will foot up about one hundred and fifty dollars.

THE NEW AMBURY.—The new armory of the Gordon Light Infantry in the bank building, when completed, will be one of the handsomest and most convenient in the up-country. The hall is 60x38 feet, with convenient gun racks and other repositories on one side. The floor is double laid, with a layer of felt cloth between the floors, with open windows on three sides and two doors on the other. It can be with a little trouble and expense turned into an entertainment hall, while the double laid floor will make it one of the finest dancing halls in the county. The Gordons hope to be in their new quarters by the 1st October at the outside. We suggest a complimentary hop as a fit celebration to their return in their once old, but now new and handsome quarters. What say you, boys?

WEATHER FOR SEPTEMBER.—Prof. C. Baker, Charlotte's local weather prophet, has handed in his predictions for the month of September, as follows: September 1, fair and cool wind; 2, cloudy and cool; 3, fair and cold; 4, cool and rain; 5, partly cloudy and mild; 6 and 7, good rains, thunder and wind; 8, cloudy and warm; 9, fair and warm; 10, partly cloudy and mild; 11, rain; 12, cloudy and mild; 13, rainy, thunder and cool; 14, little rain and cooler; 15, cloudy and little rain; 16, good rain and thunder; 17, rain and thunder; 18 and 19, big rain, thunder and wind; 20, partly cloudy and thunder; 21 and 22, fair and warm; 23, good rain and thunder; 24 and 25, partly cloudy and thunder; 26, good rain and thunder; 27, rain in the morning; 28, rainy and thunder; 29, little rain; 30, very rainy and thunder.

Can the above out and compare the predictions with the weather.

PERSONAL.—Mrs. I. J. Bell, of North Carolina, is visiting friends in the small town in life to grasp larger ones. The most important factor to our comfort and happiness, and when it is gone what pleasure is left? We feel badly, languid, sleepy, and all sorts of ailments follow. It is the morning. Morning comes, but the germs of disease have been planted; they really take root and grow in the broken-down constitution. In place of feeling better we feel more depressed and more tired than we did the previous day. Prostration is the chief of them. It is also the thief of health, for by procrastination we allow our systems to become thoroughly poisoned with disease, and once thoroughly charged with malaria or the germs of fever it is no easy job to rid ourselves of it. It is an established fact and beyond dispute though that if we keep the liver healthy and in good order it is impossible for disease to take hold on our system.

If you prefer a pill, try Dr. Gilmer's Liver Pills; or if a liquid preparation, Hill's Hepatic Panacea. They both reach the seat of the trouble, and act upon the stomach to healthy action, build up the broken-down constitution, and if taken in the morning, they will cure the disease to take hold on our system.

THEIR BUSINESS BOOMING.—Probably no one thing has caused such a general revival of trade at McCauley, Rice & Ketchum's store as their giving away to their customers of so many free trial bottles of Dr. King's New Discovery for Consumption. Their trade is simply enormous in this very valuable remedy, and the fact that it always cures never disappoints. Coughs, Colds, Asthma, Bronchitis, Croup and all throat troubles are cured by this cure-all. It is a true fact that it always cures before being used by getting a trial bottle free, large size \$1. Every bottle warranted.

Barrett's Imperial Cologne Cannot be surpassed for Fragrance, elegance and durability. McCauley, Rice & Ketchum.

TWO PETITIONS.—Two petitions have been in circulation in our town this week. One asking for the removal of Mr. Talcott, as Superintendent of the lines of the Richmond & Danville system in this State, the other asking for signatures that our merchants had no grievances against Mr. Talcott. The latter petition received the signatures of most of our business men,

the majority expressing the fact that they had no complaint to make against Mr. Talcott, as they realize the fact that he is only the agent of his superior officers in carrying out their instructions. From the statements of our contemporary, the Columbia Register, it would seem that the effort to secure the removal of Mr. Talcott originated in Winnsboro, Chester and Rock Hill. It looks very much as if the Columbia men were pulling the nuts from the fire with the hands of outside towns, since the petition made its appearance in the capital some days before it did in the surrounding towns. While our business men have grievances against the Richmond & Danville Company, they are not willing to make a scapegoat of Mr. Talcott.

COX COTTON GIN.—On Saturday morning Mr. J. M. Cox gave an exhibition in front of the Court House of his cotton gin, trasher and fire extinguisher. A number of gentlemen attended to witness for themselves the workings of the gin. The patent is upon a brush which can be attached to any gin, making it impossible with its use to run any fire through the gin, and it also makes a better sample. His first experiment was with some very dirty cotton with the attachment off, and then with it on. One of our best cotton merchants said that there was a cent per pound difference in the two samples. A box of matches was then broken up and scattered through a little pile of cotton, and the cotton saturated with kerosene oil, and set on fire and fed to the gin in a burning condition. It was extinguished without the slightest trouble by the brush. The brush can be attached to any gin, and promises to be quite an addition to that machine. Mr. Cox, the owner of the patent, is a native of Georgia. We learn that two of our farmers are negotiating for the county right for Fairfield.

CAN'T THE GORDONS GO?—Adjutant General Donham has received the following letter from T. C. DeLeon, Military Secretary of the International drill which will take place in Chicago next month:

CHICAGO, August 20.—My Dear General: Within the past two years I have had so much correspondence with you, that I am sure you are well acquainted with the fact that I am a member of the Washington and Mobile that I believe we may have the proverbial "kick in the pants" and appeal to you for the third time. Enclosed herewith, please find, circulars, etc., show fully the nature of this encampment, and you will see that it is for the first time really international. As a South Carolinian, I still have pride in the old State, which long absence has not killed, and I should be particularly pleased to see her well represented in this drill. It is possible and agreeable for her soldiers to be here.

To this end I am authorized by the management to say to you that the very best possible rate of fare have already been obtained; and that in case of a South Carolina contingent we would bear part of their expense for railroad fares. Living in camp, and all other expenses, there, will be paid by a minimum, and I have no doubt that the Palmetto boys would make a genuine sensation in the far West. Hoping to hear from you soon, with your views upon this matter, I remain, very truly yours, T. C. DeLeon, Military Secretary.

ATTEMPTED RAPE.—On Saturday Charles Veal was lodged in jail charged with attempting to rape the seven year old daughter of Mr. C. R. Joyner. The local editor took it upon himself to visit on Monday Mr. Joyner and family to learn from them a true statement of the facts in the case. By the kindness of the family he was given a private interview with the child who is charged he attempted to outrage. She said that the defendant was down in the bottom working with hay when her little brother came down, and Veal asked where they got water. The reply was, sometimes up the branch and sometimes down the branch. Defendant replied, that with a hoe he could clean out a spring on the spot which was much nearer, and sent the little boy to the house for a hoe. Before he had gotten half way back, the negro hollered and told him to tell his sister to bring the house shovel. She did so and started at once for the place. When she arrived the negro sent the boy Jesse off for his coat some three hundred yards, and during his absence Charles Veal drew the girl down in the ditch and asked her to kiss him, at the same time making other advances. Before his devilish scheme had been accomplished, Jesse arrived upon the scene, and told the villain down. He gathered by the local editor from the girl herself.

DEATH

Is something None of 's Like to

Yet we know not when disease and its ravages will attack us. We neglect the small things in life to grasp larger ones. The most important factor to our comfort and happiness, and when it is gone what pleasure is left? We feel badly, languid, sleepy, and all sorts of ailments follow. It is the morning. Morning comes, but the germs of disease have been planted; they really take root and grow in the broken-down constitution. In place of feeling better we feel more depressed and more tired than we did the previous day. Prostration is the chief of them. It is also the thief of health, for by procrastination we allow our systems to become thoroughly poisoned with disease, and once thoroughly charged with malaria or the germs of fever it is no easy job to rid ourselves of it. It is an established fact and beyond dispute though that if we keep the liver healthy and in good order it is impossible for disease to take hold on our system.

If you prefer a pill, try Dr. Gilmer's Liver Pills; or if a liquid preparation, Hill's Hepatic Panacea. They both reach the seat of the trouble, and act upon the stomach to healthy action, build up the broken-down constitution, and if taken in the morning, they will cure the disease to take hold on our system.

THEIR BUSINESS BOOMING.—Probably no one thing has caused such a general revival of trade at McCauley, Rice & Ketchum's store as their giving away to their customers of so many free trial bottles of Dr. King's New Discovery for Consumption. Their trade is simply enormous in this very valuable remedy, and the fact that it always cures never disappoints. "MORRIS CREEK" VS. "LIGHT"

Messrs. Editors: I now proceed to conclude my reply to "Light's" article, which I shall try to do in short order. "Light" again quotes from "Morris Creek": "I believe that railroads benefit the few, but tend to the injury of the many." He makes no attempt to disprove this; he only mentions what line of action he would favor "if this be so." There is nothing therefore to reply to. Again "Light" quotes from "Morris Creek": "Railroad facilities tend to hinder and check the amount of production," etc. "Morris Creek" gives a reason or rather a proof for this, and "Light" makes no attempt to disprove it, but only says "if we are induced to neglect our interests, and impoverish ourselves we are bad boys," etc. Being bad boys cannot prove that our people are not producing more crops (meat and bread at home), and we have no railroads. What is consumed (food) is not taxable property, it does not increase the wealth of the State; and every dollar sent out of the State to buy food leaves the State that much poorer, and were it not for railroads our money would not be sent out of the State to buy it, but we would raise it at home. I know this argument is made gratuitously, in support of my own declaration, but is "Light" in the discussion, as "Light" has not disproved it, unless being bad boys and deserving punishment disproves it. When "Light" says: "In regard to the facilities of transportation favoring cornering on the necessities of life," "Light" says: "When a corner is made on the necessities of life, transportation to a great extent stops, and these things are piled up and held until the time comes to sell!" Exactly so. Here he admits the magnitude of the evil. While these things are piled up and held until the time comes to sell, the necessities of life are suffering. And when would the time come to sell if there were no railroads? Were every section of our country to raise its own supplies, it would in a great measure kill the railroads, and failing to do the railroads are killing them. It is now the railroad, the people, or the people's railroad. Their interests are antagonistic at the present time, and I believe by the people's agricultural portion. They need not be antagonistic, but they are now. It is to the interest of railroads to bring all our meat and bread to us, while it is to the people's interest to raise both at home. By neglecting to do this we are sending off our money to support the great railroad dignitaries of the North.

One other point remains to be noticed which I regret "Light" has referred to. He says: "I venture to believe that the public school system has enemies even in the neighborhood of 'Morris Creek.'" "Morris Creek" knows no one in his neighborhood opposed to public schools as such, but he knows of one man at least, who is opposed to what he believes mismanagement in some of the operations and appliances of the system. 1st. He believes it is unjust for public schools to run unequal lengths of time in the same township. 2nd. He believes it is unjust for one teacher to teach 35 or 40 pupils for \$25 per month, and another to get the same salary for teaching five or ten, both having first grade certificates. 3rd. He believes it is unjust for oil school districts to be just for oil school districts to be established for the accommodation of one or two patrons, and with much less than half the number of scholars. 4th. He believes that for our best and highest first grade teachers to receive only \$25 per month is a reproach to the county. 5th. He believes that the patrons should have a vote in the selection of a teacher for their children. For these opinions constitute a bona fide enemy, then "Morris Creek" is an enemy. I say this because "Light" has brought up the subject, and "Morris Creek" must be true to his convictions. But in saying this "Morris Creek" means no reflection or censure upon anything in this action, who is no doing the best he can; nor do I mean or intend the least reflection upon any of our teachers, for many of these, for their labors and faithful work, deserve double the salary they receive. If "Light" is so facts intimated in the foregoing statement and will apply privately to "Morris Creek," he will furnish him with the facts and the names, but he cannot consent to be a party to the naming of names of several of our best teachers into this Herald. And if "Light" finds that facts intimated do not or have not existed, and will convince "Morris Creek" of the same, then "Morris Creek" will make to "Light" a public acknowledgment in THE HERALD that he was mistaken.

MORRIS CREEK.

NEW ADVERTISEMENTS.

DEAFNESS. Its causes, and a new and successful CURE at your own home, by one who was deaf twenty-eight years. Treated by one of the noted specialists without benefit. *Cured himself* in three months, and since then hundreds of others. Full particulars sent on application. T. S. PAGE, No. 41 West 31st St., New York City.
